REVIEWS

"Thank you for teaching, caring, and providing such a wonderful place for the children to grow and learn. We love sending her to preschool and hearing about all the amazing activities and things that take place! I love how your program is child-led"

Chylanne S

"We happily travel a little further to Explore Science Club because we love the program. Nehal is fabulous at engaging the kids with their environment and allowing for free play and exploration as well. I love hearing my daughter's interpretation of whatever natural phenomenon they've been discovering that day. I highly recommend!"

Zoë B

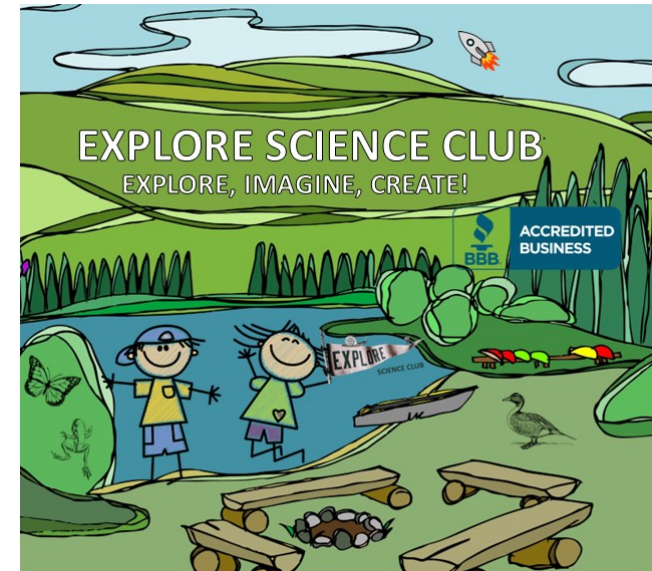

"My kids enjoy ESC! So much outdoor learning and fun/creative activities planned each week!"

Megan A

Science Enrichment Programs, Courses, & Events

CHILDREN AGED 3-12

Learning that empowers minds and hearts!

ESCape outdoors!

"Look deep into nature, and then you will understand everything better"

Albert Einstein

Established in 2018, ESC's unique STEAM curriculum makes science learning fun through a combination of guided learning and outdoor free play.

"Your integration of nature, science, and child development is amazing and we couldn't be happier with your program"

Katie W

"Thank you for providing my son with a wonder experience at your Science Club....My son comes home thrilled about what he learned and accomplished"

Nadine C
